FOURTEENTH ANNUAL REPORT

OF THE

MEDICAL SUPERINTENDENT OF THE

LUNATIC ASYLUM FOR THE

COUNTIES OF SALOP AND MONTGOMERY,

AND THE ASSOCIATED BOROUGHES OF

MUCH WENLOCK, SHREWSBURY, & OSWESTRY.

ON the first of January, 1858, the Number of Patients in the Asylum was 329 (viz: 152 Males and 177 Females.) In the course of the year 100 Patients viz: 50 Males and* 50 Females) were admitted; 48 (viz: 22 Men and 26 Women) were discharged Recovered; 9 (viz: 2 Men and 7 Women) were discharged Relieved; 1 Woman was discharged not improved; and 33 (viz: 15 Men and 18 Women) died.—The number of Patients remaining in the Asylum on the 31st, December, 1858, was consequently 338 [viz: 163 Men and 175 Women].—This shows an aggregate increase on the number of Patients remaining at the end of the previous year of 9,—an actual decrease of 2 in the number of Women, and a consequent increase of 11 on the part of the Men alone.

The daily average number of Patients resident during the year, 1858, was 337 [viz: 156 Men and 180 Women].

* No person was admitted twice in the course of this year, excepting one Woman. This circumstance reduces the number of Females received to 49 individuals, and the aggregate number of individuals of both Sexes admitted during the year 1858 from 100 to 99.

Comparing the number of Recoveries with the average number of Patients resident during the year 1858, the proportion is found to be about 14.273 per Cent., or 14.102 on the Men, and 14.444 on the Women.—The general average per Centage of Recoveries during the preceding 13 years was 19.9 upon both sexes; 16.619 on the Men, and 22.777 on the Women. [See Table A].

With respect to the Mortality during the past year, the general per centage of Deaths on the average number of Patients of both Sexes was 9.79; that of the Men being 9.615, and that of the Women 10.—This per centage of Deaths is below the aggregate average proportion of the 13 preceding years which amounts to 13.67 on the Men, and 8.36 on the Women; or a total per centage of 10.99 on the average number of Patients of both Sexes resident during that period. [See Table B].

TABLE A. exhibiting the average number of Patients in the Asylum during each year from the period of its opening in 1845 with the actual annual numbers of Recoveries, and the per centage of those upon the respective annual average numbers of each sex.

Notwithstanding the intention expressed in the brief Report of last year to complete the description of those extensive improvements which have rendered the Institution so much more efficient for its purpose than it ever was before, the Medical Superintendent has not yet had the opportunity of executing that intention, and must consequently again postpone the proposed statement until he can have such assistance in the discharge of his general duties as will enable him to draw it up without interruption and without embarrassment.

RICHARD OLIVER, M.D.

January 1st, 1859.

The following is a List of the various Articles made and repaired by the Patients during the year 1858.
